

[illegible]

A circular phylogenetic tree showing the relationships between 100 genes. The tree is color-coded by expression pattern: blue for 'Pre' and red for 'Mid'. The genes are arranged in a clockwise circle, with labels for each gene. The tree shows a high degree of clustering, with many genes having very similar expression patterns. The 'Pre' genes are generally clustered together, and the 'Mid' genes are generally clustered together. The tree is rooted at the top, with 'Pre' and 'Mid' labels at the top.
